Corrections to the printed thesis:

Location	Correction
Supervisors and committee	Typo in name: Jonas Bergquist
List of publications	The title of Paper III should correspond to the manuscript: “Nitration of MOG diminishes its encephalitogenicity depending on MHC haplotype”
Frame: 1.1.2.1. (pg. 1)	Typo in line 2: <i>salutatory</i> should be <i>saltatory</i>
Frame: 1.1.2.4. (pg. 5)	Phrasing in line 2; The sentence should read: “The CNS entertains a B cell fostering milieu in MS: tertiary lymphoid follicles inside the CNS and diagnostic oligoclonal immunoglobulin bands are hallmarks of CNS inflammation in MS”
Frame: 1.4.1. (pg. 29)	Phrasing in 3 rd paragraph; “[...] during the conversion the protein backbone chain is transferred to the residue’s side chain and represents an irregularity. The occurrence of iso-aspartate is repaired by the enzyme Protein L-isoaspartyl methyltransferase (PIMT).”
Frame: 1.5.4..2 (pg. 45)	Typo in last paragraph: the dose of 50 mg/mL should obviously be 50 µg/mL
Study II, Fig. 1.	Figure 1: the image for the first MAA adduct is linked to the wrong file and shows an acetylation instead of the listed MAA adduct. The image has been replaced in a corrected version.
Study III, pg. 8	Typo: ‘do detectable symptoms’ should be ‘no detectable symptoms’
