The bar chart shows the percentage of patients with various test results across different conditions. Here are the conditions and their respective percentages:

- **Spirometry**: 100%
- **FeNO**: 90%
- **Saliva (cortisol)**: 90%
- **Feces (microflora)**: 90%
- **Urine (eicosanoids)**: 40%
- **Any blood sampling**: 90%

The chart indicates a high percentage across all tests except for Urine (eicosanoids), which is significantly lower at 40%.
