

ERRATA FOR THESIS FOR DOCTORAL DEGREE (Ph.D.)

Environmental Etiologies of Autism and Other Neurodevelopmental Conditions: Twin Studies of the Cumulative Effect of Early Medical Events

By

Torkel Carlsson

Chapter 5, Discussion, p 30, last paragraph, second last sentence:

Reads: Suspected environmental factors that were shown to have association to NDC beyond familial confounding in **Study I** are the only results that are somewhat interpretable on an individual level.

Should be: Suspected environmental factors that were shown to have *no* association to NDC beyond familial confounding in **Study I** are the only results that are somewhat interpretable on an individual level.
