

**Errata list** C Wallquist - Thesis: Innate immunity and cardiac structure in chronic kidney disease

**1 List of scientific papers - page 3**

Both Publication II and *Other publication not included in thesis* - Author list incorrect. Correct list is as follows: Anna M Asp, Carin Wallquist, Anette Rickenlund, Britta Hylander, Stefan H Jacobson, Kenneth Caidahl and Maria J Eriksson

**2 Page 11, Line 14**

Abbreviation occurring first time in text but not explained. LVH should have been **Left Ventricular Hypertrophy (LVH)**

**3 Page 15, section 2.6, line 5**

In brackets (Figure 1) should be (Figure **2**)

**4 Page 20, section 2.11, line 13**

Abbreviation occurring first time in text but not explained. -DCs should have been **dendritic cells**

**5 Page 23, Table 2 – Misplaced asterix**

\* = matched for age and sex: The symbole \* should have been positioned in the table in the control group cell not in the cell of the advanced CKD group

**6 Page 29, section 4.7**

Oxidative Metabolism (IIII-IV) should of course be **(III-IV)**

**7 Page 30, paragraph 5:2**

Chi-square test ( $v^2$ ) should be Chi-square test ( $\chi^2$ ) (22th letter of the greek alphabet)

**8 Page 42, paragraph 6.5.1 - Missing word**

Should read : Systolic movement measured by AV-plane method **and** with TDI

**9 Page 42, Fig 15 – image and image text**

LVH prevalence with Teichholz 2D echocardiography showed no significant difference” - should instead read **LVEF in percent (%)** with Teichholz

**10 Paper I last page under discussion paragraph 3, page line 27**

”In **3-5** patients with CKD, monocytes have been shown to” Should read: ”In patients with CKD, monocytes have been shown to”

**11 Paper II - Page 3 (p 225 in journal) under the subtitle Tissue Doppler Imaging – last sentence**

DI variables were measured by two experienced sonographers and are presented as *the mean of three cardiac cycles*. Should read *”the measurements of **one cardiac cycle**”*.

**12 Paper III, page 271, under Results - Glomerular filtration rate, last scentence**

”During the 5th year, patients had an iohexol clearance mean of  $49.6 \pm 16.8$ ”

Should read ”During the 5th year, patients had an iohexol clearance mean of  **$49.9 \pm 17$** ”

**13 Paper IV, Figure 1 – Legend text**

”Controls n = 47, CKD 2 n = 45, CKD 3 = 22”

Should read: ”Controls n = 47, CKD 2 n = **32**, CKD 3 n = 22”
